1. Course & Student Info

Field	Value
Course:	CS423 / CSC13003 – Software Testing
Assignment ID:	HW01-AI
Assignment Title:	HW01 – QA/QC Jobs · 20 Defects · Test a Physical Product
AI Use Category (1–5):	Category 4
Date:	23/05/2026
Student name:	NGUYỄN THIÊN NHẢ TRÂN
Student ID:	23127272

2. Disclosure Questions

1. AI tool(s) used:

Gemini

2. Stage(s) of the assignment where AI was used:

☒ brainstorming

☒ drafting

3. Main prompts or tasks given to the AI:

Paste the 2–3 most impactful prompts verbatim. For the full transcript, attach Appendix A (prompt_log.md).

“ You are a experienced QC/QA searching through the job market for related works, in this document

[https://docs.google.com/document/d/1XjL32sek46qQJiF-vVN1nIn0i1jHrRfg_EMsKdLk-s/edit?usp=sharing] , I've collected 10 QA/QC related work, for each job write a 1-2 sentence critiques.”

“Search for 20 recent software defect (between 2022-2026), in which at least 5 of which is caused by AI. Cite articles in which the defect is mentioned. For each defect, include source link, description, severity, consequences, solution.”

4. Specific parts of the work AI contributed to:

Be specific. Example: 'AI generated TC01–TC15 in Section 3.2; I rewrote TC04 and TC11; AI did NOT contribute to Sections 1, 2, 4, or the AI Critique.'

- AI generated the initial draft of the 10 QA/QC job description critiques.
- AI generated the initial list of software defects (2022–2026), but I rewrote the section to fix hallucinated URLs and incorrect dates.
- AI drafted the baseline test cases for the Sharp KS-IH191V-RD rice cooker; I removed hallucinated smart features and manually added hardware-specific edge cases.
- AI generated the initial text outline and image for the mindmaps, which I modified to fix spelling errors (e.g., "AI Trool"). AI did NOT contribute to the physical device execution videos, the AI Critique, or the Conclusion.

5. How I reviewed, revised, or verified the AI output:

Describe your verification method (ran the test, checked the spec, asked the TA, looked up RFC, cross-checked with the ISTQB syllabus, etc.).

I verified the QA/QC job critiques by reading the original job postings and confirming the AI's analysis aligned with the text. For the software defects list, I manually clicked the AI-provided URLs and searched the reported event dates, which revealed hallucinations; I corrected these by finding valid sources and actual defect dates through Google Search. I reviewed the Sharp rice cooker test cases against the appliance's actual physical specifications and user manual, deleting test cases for non-existent smart features and adding real-world edge cases. I visually inspected the mindmap images and manually corrected typographical errors.
