

AI Audit Report - HW05-AI

1. Student Information

Field	Value
Student name (printed):	NGUYEN THIEN NHA TRAN
Student ID:	23127272
Class / Cohort:	23KTPM2
Assignment ID:	HW05-AI
Assignment date:	2026-08-17
AI tool(s) used:	Codex; Context7 documentation connector
AI used in this assignment:	Yes

2. Instructions

Each row records one AI-assisted artifact. **INCOMPLETE** is used because the student has not yet supplied the mandatory screenshots/video, confirmed group uniqueness, or signed the final review. The student must review and may change each verdict before submission.

3. Audit Table - one row per artifact

(1) Prompt + Tool	(2) AI Output	(3) Verdict	(4) Reasoning	(5) Student Fix
Tool: Codex Time: 2026-08-17T02:35:49Z Prompt: "Làm theo bt của tôi, theo scenario D"	Generated four JMeter plans and Scenario D data/setup/validation tools. Evidence: performance/plans/ , performance/tools/ , and transcript Interaction 1.	INCOMPLETE	Plans pass structural validation and a real smoke test, but assignment compliance also needs student confirmation that no group member duplicates the workflow.	Student must inspect the plans in JMeter GUI, confirm group uniqueness, and accept or revise workload assumptions.
Tool: Codex Time: 2026-08-17 Prompt: Same interaction	Executed Load, Stress, Spike, and Endurance with raw JTL, HTML dashboards, resource CSV, run metadata, and one preserved invalid Spike attempt. Evidence: performance/results/ .	INCOMPLETE	Machine-readable evidence is real and traceable. Mandatory same-frame screenshots and the student's narrated video cannot be supplied by AI.	Student must capture screenshots during a rerun if needed, record own narration, and add the YouTube URL.
Tool: Codex Time: 2026-08-17 Prompt: Same interaction	Produced AI-initial-analysis.md , recomputed .stats.json files, and the human-review/misinterpretation tables in main-report.md .	INCOMPLETE	Corrected values are traceable to raw JTL. The label "human review" is not final until the student personally checks and accepts every correction.	Student must recalculate spot checks, review optimization classifications, and sign responsibility for the final interpretation.
Tool: Codex Time: 2026-08-17 Prompt: Same interaction	Produced the continuous-performance-testing flow chart, trade-off analysis, and 200-300 word critique in main-report.md .	INCOMPLETE	The required topics are present, but the student must verify the proposed 15% regression gate against course guidance and personal judgment.	Student should accept or modify the gate and explain any change during oral defense.
Tool: Codex Time: 2026-08-17 Prompt: Same interaction	Reused and validated three local Agent Skills: plan design, evidence execution, and JTL analysis.	INCOMPLETE	Skill source is included, but the assignment also asks for an end-to-end skill demonstration video.	Student must record the demonstration and add its URL.

4. AI Use Declaration

I use AI tools for the following tasks: source-guided Scenario D test design, JMeter plan generation, data seeding and preflight tooling, execution automation, raw-log analysis, report drafting, AI misinterpretation review, continuous-testing proposal, and audit preparation.

5. Signature / Submission Checklist

Item	Status
Every AI-assisted artifact has a prompt	Done
Every AI-assisted artifact has output evidence	Done
Every output has a verdict	Done - provisional INCOMPLETE pending student review
Invalid or incomplete outputs have student fixes	Done
AI-original vs final-file comparisons attached when applicable	Not applicable
Codex/chat transcript attached	Done

Student confirmation: I reviewed all AI-generated material and remain responsible for the correctness of the submitted work.

Student signature/date: TBD - student must sign
